Volume 32

FRIDAY OCTOBER 12th, 1934

Number 31.

Bank Of Montreal  
Crop Report

After having been interrupted by rains and snow, threshing has been resumed in many districts in the Prairie Provinces, and with good weather should be completed in Saskatchewan and Manitoba within ten days. Conditions are more backward in Northern Alberta and Peace River areas, where much grain is unthreshed and some coarse grains uncut. The frosts and wet weather of recent weeks have lowered grades. In Quebec the weather has been favourable for harvesting and crops are up to average, exceptions being apples and to some extent tobacco. In Ontario root crops have been further improved by recent good weather; pastures generally are now in excellent condition, and an average to good crop of corn is being cut. In New Brunswick and Prince Edward Island crops are proving satisfactory. In Nova Scotia field crops are short, due to drought, but late apples promise a fair average crop. In British Columbia, where crops generally have been good favourable conditions. Details harvesting is continuing under follow:

## PRAIRIE PROVINCES

Alberta. Northeast Area. A considerable portion of the crop remains unthreshed and wheat is now grading tough. South eastern Area. Harvesting is practically completed. Pastures have improved. Western Area. In the north one week's favourable weather is required before threshing can be resumed. There has been some sprouting of grain. In the south harvesting has been resumed, but much grain is too damp to thresh. The digging of sugar beets, delayed by snow, is again under way. Saskatchewan. Northern Area. Wheat is about 65% to 70% threshed, there is a wide variation in the yield. Coarse grains are light, and there is a shortage of seed oats in a number of districts. Southern Area. Threshing is nearly completed. Wheat has graded high, but yields are poor. Practically no coarse grains have been harvested and the feed situation is acute. Manitoba. Except in Swan River Valley district little grain remains to be threshed and a good percentage of the crop has been marketed. Winter feed will be a problem over the central and southwestern areas. The soil has benefited from rain and snow and fall ploughing is well advanced.

## PROVINCE OF QUEBEC

A good crop of oats is reported with other grains yielding well. Fodder corn is spotty but on the whole a good crop. Potato digging is general with the yield well up to average and of good quality, other root crops are satisfactory. Late varieties of apples show some improvement but the crop will be far below average. Pastures have improved considerably as a result of recent rains. The tobacco crop, which is now curing is slightly below average in quantity with the quality fair to good.

## PROVINCE OF ONTARIO

Fall wheat seeding operations are completed and growth to date has been very satisfactory. Threshing of spring grains is near completion. Recent good weather conditions have promoted late growth of root crops and potatoes particularly will show a better than average yield. Yields of onions and beans are below average and spotty. Harvesting of tobacco on considerably reduced acreage is practically completed, the yield of flue tobacco of fair quality being about 35% under early estimate. The burley tobacco yield is up to average and the quality good. Grapes are being cut and the bulk of the crop has

been contracted for at \$40. to \$45. a ton. The yield of pears was close to average, but apples, peaches and plums were a light crop.

## MARITIME PROVINCES

In Prince Edward Island grain yields are satisfactory and of good quality. The potato crop will be slightly under average; turnips and pasture would be benefited by rain. Throughout New Brunswick an average crop of oats and barley has been harvested; potatoes are yielding well and a normal crop of other roots is expected. Pastures continue in fair condition. In Nova Scotia the quality of grains harvested is good but yields will be less than average. Due to drought, only a fair yield of potatoes and other roots is anticipated. Late apples are colouring well but need more rain to help the sizing; the crop will be a fair average one. Pastures are still very dry.

## PROVINCE OF B. C.

The threshing of grain and haying operations are practically completed, the yields of 100% to 115% respectively indicated. The potato crop will not be as heavy as originally estimated. Indications point to a good yield of onions but the crop is not drying well in some districts. Tomato shipments to canneries are completed; a large quantity is being left in the fields. Apple, pear and plum crops are of good quality generally and are moving satisfactorily. Pastureage is good.

ST. LOUIS CARDINALS WIN  
WORLD'S CHAMPIONSHIP

Forcing the series to the full seven games, the St. Louis Cardinals clinched the World's Championship Baseball crown by whitewashing the Detroit Tigers in the seventh game on Tuesday, at Navin Field. Detroit, before a howling, frenzied mob of fans, who because of a run-in between Owen of Detroit and Medwick in the seventh, refused to behave themselves and let the game proceed until Medwick had been taken from the game.

The series hung up a number of new records, and upset the dope of the dopers in numerous ways. Both teams were in to win and each game had some surprise. On Sunday, the Tigers, behind the pitching of Bridges, bested "Dizzy" Dean won the game, only to take a whitewashing from him on Tuesday. How do you explain that? Anyway, without explaining the Cardinals are the Champions.

We hope this weather keeps on till Christmas. What's your hope?

The bright weather has been made the most of by farmers and beet growers in getting threshing finished up, and the beet harvest as far along as is possible.

Mr. and Mrs. O. H. Snow returned home Tuesday afternoon after a two weeks absence during which time they attended Conference in Salt Lake City. The heavy storm we had only reached Utah, with very little moisture, and things are very dry and burned there.

W. J. Forbes, teller at the local branch of the Bank of Montreal has been transferred to Medicine Hat and Mr. Bradley of Camrose is the new assistant here. The change was made over the Thanksgiving holiday. Our best wishes to Mr. Forbes and our welcome to Mr. Bradley.

Funeral Services  
of Clifford Fraser

Funeral services over the remains of Clifford Fraser were held in the Raymond Second Ward Chapel Tuesday, October 9th, at 2 p.m., with Bishop J. H. Walker in charge. Considering the busy season, there was a large crowd present to show their respect to the departed, and their sympathy to the mother and two brothers who are all of the family that survive, the father and another brother having passed away several years ago.

C. B. Strong had charge of the Choir were "I Know That the singing, and the numbers by My Redeemer Lives" with Mrs. Muriel Terry singing the Solo, "Lead Kindly Light," and "Abide With Me."

Special musical numbers were: Quarett, "I Think When I Read That Sweet Story," Messdames J. E. Earl, and H. F. Allen, and Messrs W. C. Stone, and Ira McBride; Solo "My Opportunity," Mrs. Blanche Scoville. Solo "I'll Go Where You Want Me to Go," Bishop James H. Walker.

The speakers were Pres J. W. Evans, L. L. Palmer and Bishop Walker, who spoke of the Resurrection, Immortality of the Soul and Responsibility of this Life. All the speakers paid high tribute to the deceased, who had lived a good life, and been a source of joy and comfort to his mother for several years especially since the death of his father, when he had taken the

responsibility of managing the farm and looking after things. Invocation was offered by Elder L. D. King and Benediction by Elder Wilford A. Heninger.

Interment was in the local cemetery with Christensen Bros in charge of the arrangements. A good cortege followed the remains to the cemetery.

Floral offerings were beautiful and profuse, showing the esteem in which the family is held by their many friends in Raymond and district. The sympathy of the entire community is extended to the family in their bereavement.

## BIOGRAPHICAL

Clifford Fraser was 32 years of age, and had been in good health all his life. On Monday of last week he was taken to the hospital for an appendicitis operation when it was found the appendix was ruptured. An operation was performed, which was successful, but the poison had spread through his system from the rupture, and despite all that human skill and kindness could do, he passed away Sunday afternoon.

Since the death of his father he and his brothers, both younger than himself had kept the farm going and had provided for their mother. His mother and two brothers Ralph and Lewis survive him.

## News Notes

Our next holiday will be Armistice Day, November 11th.

Mr. and Mrs. S. I. May and family were visitors in Tyrell Lake Monday afternoon.

Judging by the long hours that beet haulers are putting in some of them must sleep on their wagons.

Born to Mr. and Mrs. J. F. Judd, Saturday, October 6th, a baby boy. Mother and son are doing nicely.

Ellwyn Tollerup was taken to the Lethbridge Hospital this morning for an appendicitis operation. At this writing no report has been received regarding the operation proper.

Crown Prince Peter, 11 years old, has been proclaimed King of Yugoslavia by the decision of both houses sitting in session following the murder of King Alexander.

Thanksgiving Day was quietly celebrated in Raymond, at places of business being closed and people left to enjoy themselves for the day. As usual the innocent turkeys suffered heavily from the appetites of their destroyers.

One Lethbridge motorist has his driver's license suspended for three months when he was fine for negligent driving. Hard medicine, but we are of the opinion that more of this would make roads safer for the motorist who really does try to be careful and sensible.

Magrath schools are dismissed for a week while students are busy in the beet fields. This includes the High School and part of Grade 8. There was so many out that the Board and staff decided on this course, and the time will be made up at Easter time. We understand that some grades of the Stirling school are also dismissed for some time.

Beet Harvest Nearing  
Half Way Mark

## Mrs. Ross Honored

Prior to her departure for Utah, where the family expect to make their home, Mrs. R. B. Ross was guest of honor Tuesday afternoon at a delightfully arranged party at the home of Mr. and Mrs. T. O. King sponsored by the Second Ward Relief Society and the local U. F. W. A.

The afternoon was spent in conversation and visiting and dainty refreshments were served. The Relief Society presented Mrs. Ross with a purse of money and the U. F. W. A. presented an Autograph Album, in which each person present at the party wrote some sentiment.

During Mrs. Ross' residence in Raymond she has been an industrious worker in church and civic organizations and this party was in appreciation of her labors.

The best wishes of the community will go with the family on their journey to their new home.

## Birthday Party Held

Mrs. Annie Adams entertained Thursday afternoon October 4th, in honor of the 12th birthday of her daughter Elma. The afternoon was spent in games and refreshments. A treasure hunt, was one of the features and prizes were won by June Anderson, June May, Stella Atwood, Beth Evesson and Elma Adams.

A lovely lunch was served, the table being centered by the birthday cake with its twelve candles, and colored streamers added to the decorative scheme. A very enjoyable time was had by all present.

Those present besides Elma the guest of honor, were: June Anderson, Stella Atwood, June May, Beth Evesson, Lavina Lafferty, Margaret Nilsson, Joyce Phillips, Leatrice Scoville and Maurine Powelson.

## News Notes

E. S. Heninger of Magrath was a Raymond visitor on Wednesday.

Mrs. P. M. Collett of Taber, here for a visit with her daughter, Mrs. J. F. Judd and family.

John T. Heninger of Lucky Strike was a Raymond visitor on Tuesday of this week.

J. U. Alfred has discarded one of his crutches now and gets along well with one. He still has to be careful and not jar his leg.

Six people were killed and a three storey building was burned to the ground following an explosion which rocked the city of Halifax. Cause of the fire is still undetermined.

Fire destroyed the barn on Byron Wall lot about 11 a.m. today. The engine was on the scene in good time, but the lumber and straw, burned very rapidly and only charred pieces of the structure were left. No other damage was done by the blaze.

The Canadian Utilities built a power line across the end of the Factory Lake this week, to connect a motor to the pipe line from the Shafer Lake into the Factory Reservoir. Heretofore a gasoline engine has been used. The boys described this as great fun, especially when they got marooned out in the Lake for a couple of hours.

Good weather as favored the digging of beets, and growers have been working early and late to get the sweet roots out of the ground. Freight trains, solid trainloads of beets have been coming from Taber-Barnwell and the Lethbridge Northern all hours of the day and night, and the sheds for car beets will soon be filled to capacity, and then shipments will be curtailed to the number of cars that can be put through each day, about 25.

Slicing has been in progress for some days, but more in the eastern districts. The two pillars at work now have been handling between 1,500 and 2,000 tons of beets each day, and the only one, sited within hauling distance of the Factory have been those in excess of what could be hauled in.

By now approximately 60,000 tons are in the sheds at the Factory, and another 20,000 tons on top of the ground which means that the huge crop of 160,000 tons or more is about half harvested. Everyone is hoping for good weather to complete the harvest without frost, and if this is possible, then the Factory will hang up a new record for the amount of sugar made in a single campaign.

## Wedding Bells

## JONES — HANSON

Miss Monte, eldest daughter of Mrs. Julia Hanson, of Mt. View and Heber A. Jones of Cardston, were married in Cardston on Saturday evening, Z. W. Jacobs performed the ceremony. After a brief honeymoon trip the happy couple will make their home in Cardston.

A turkey supper was given in their honor Thursday night at the home of Mr. and Mrs. H. A. Jones when five sons and their wives, also the daughters were present "Bill" who works with Heber in Cardston was unable to get away from his work.

Congratulations to Mr. and Mrs. Jones and best wishes for a long and happy married life.

MARY KNIGHT ENTER-  
TAINS FRIENDS

An unusual event took place at the home of Mr. and Mrs. Ray Knight on Monday evening when a scavenger party was held at the home. The party commenced with a scavenger hunt for the following articles: a lock of red hair, 1 toothpick, gents garter, a fly, either dead or alive, a tricycle, an aspirin, 1/4 inch of fingernail and the end of a cow's tail. The gods were judged by speed, quality and completeness. Garth Peterson as judge, gave the 1st prize, a box of Moir's chocolates, to Miss Melba Heninger and Roy Woolley.

A delicious lunch was served by the hostess, and a very enjoyable time was had by all. Those present were: Smellie Redd, B. Mendenhall, Rosemarie Wood, Garth Peterson, David Wood, Rae Mendenhall, Lucille Allred, Laura McLean, Melba Heninger, Ila Hicks, Maurine Redd, Bert Boyson, Doral Stone, Irene Redd, Lyman Hardy (from Stirling), Roy Woolley, Mary Walker, Guy Wing, Willis Taylor and the hostess, Miss Mary Knight.

### SUSPEND MORE DRIVER'S LICENSES

A harmless and respectable looking individual recently walked into the dock at the police court and was charged with the "crime" of having tried to kill himself. There is no evidence to show whether society would have been better or worse had he succeeded in this attempt, but if he had attempted to kill off a few fellow-citizens along with himself there would have been no doubt that he was a very dangerous individual against whom the law has provided its severest penalties. Nor would judges, magistrates or juries have been likely to regard his crime as a trifling matter.

There are, however, numerous otherwise harmless, also respectable individuals who are very active in their attempts to kill themselves, and a few others with them, whom we do not regard as potential suicides and killers at all. They are only incompetent and careless motorists, who generally suffer nothing worse than a fine of fifteen dollars and costs, which has as much effect on their behavior as a slap on the wrist.

Calgary is literally infested with incompetent motorists, and the present methods of dealing with them appear to be inadequate. Not only speeding, but gross lack of driving sense is rampant, and many offenders are getting away with it.

This has been a general condition throughout the continent, with the exception only of three states, New Jersey, Delaware and Connecticut. These states have effected a decrease in motoring fatalities. They have accomplished this by the ruthless application of the only really

effective deterrent to fool driving—the suspension of the driver's license for a lengthy period. This can be done and is done in Calgary but not often enough. There is only one safe place for the fool driver and that is off the streets. Thus only will the motoring suicide and fatality rate be reduced. — The Calgary Herald.

### MAIL ORDER HOUSES AND ADVERTISING

While the Recorder does not make a rule of appealing to the merchants editorially in the matter of advertising, a recent statement made by the manager of a Toronto mail order house should bring home the fact that these large concerns have eyes glued on the actions of merchants of the smaller cities and towns. The statement referred to follows:

"We have a bureau whose duty is to read each week the country newspapers. There is not a paper of any consequence in our trade territory we do not get. The bureau looks over these papers and when we find a town where the merchants do not advertise in the local paper, or where they do not change their advertising regularly, we immediately flood that section with our literature. It always brings results far in excess of the same effort put forth in the territory where the local merchants use their local papers."

Every local merchant in Raymond knows that a large number of merchandise catalogues are sent in to our town at regular intervals, and that many dollars flow out of Raymond to buy the goods advertised in that type of literature. Store-keepers cannot force people to buy locally, but they can do the next best thing—show the public what they have to sell by advertising their wares in the columns of their local newspaper. Advertising has built up mail order houses and used intelligently it can build up a small business just as well.

### Correspondence

The Manse, Kincaid Sask.  
September 15th, 1934

Dear Reader:

For the sixth successive year this district has experienced drought and consequently, crop failure. Our Minister of Agriculture Hon. J. G. Taggart, says this is the worst year since the drought commenced. Can you visualize what this means to people who have passed through these six years to meet each year with worn out farm machinery; with inadequate clothing and bedding, and with many things in the home in need of replacement? It has been a heart-breaking experience this past summer after such a promising start to see the crops wither and burn up under the scorching July sun.

The outlook for the future seems dark, and unless rains come this fall what hope is there for a crop in 1935? Sloughs are drying up, wells are giving out and many farmers are hauling water for miles to keep their stock alive. But we are people who live in HOPE, and we hope to be able to carry on until better times come, for surely the drought cannot last much longer.

For the past five years I have been engaged in relief work and during these years have received help from many parts of Canada which I distributed to the needy people of this district. Last year much clothing, food and Xmas gifts to children were distributed; and were greatly appreciated by those who received them.

We are again planning to carry on our work and I am again appealing to you for help to carry on this most necessary work. We shall not soon forget all that the kind people of Canada have done for us during the past five years and it is this generous help which we have received in the past that makes me confident to make this further appeal.

It is impossible for me to describe the condition of many people in the drought area, but the least that can be said is that the condition is a most desperate one and it is through no fault of their own that the people are faced with such hard times.

Will you kindly remember our

## 7. BREAKING THE TARGETS

NATURALLY, no amount of reading about Skeet will help you as much as even a few practice shots, and you will find the information contained in these articles of greater value once you have made a start at the game. It is for this reason that we suggest you keep the complete series for future reference, so that you will be able to practice the advice given to you hereafter. The following suggestions come from a well-known Skeet shot, Frank G. Traeger, Jr., of Roseland, 1933 New Jersey State Skeet Champion, and will undoubtedly be helpful to the beginner. Mr. Traeger won the State Championship with the perfect score of 100 straight, and was also High Gun in the Tri-State Shoot, including Pennsylvania, Delaware and New Jersey, breaking 99 x 100.

He writes: "Shooting Skeet requires not only the haphazard pointing of a gun in a predetermined path and spasmodic firing of the gun, but also requires extreme alertness and the coordination of the mind, eye and trigger finger. Skeet differs from straight trapshooting in that the gun used is the same one employed in field shooting, and the shooting position is the same a hunter would use when expecting to flush birds. This means that you are increasing your skill with the very gun you would use in

actual field shooting. I have heard some hunters say that they enjoy Skeet nearly as much as actual field shooting, and to a certain extent it has its advantages—it can be shot in all kinds of weather and at all times of the year.

"The type of gun is a matter of individual taste and preference. The same applies to length of barrel and how it is bored. Once a gun lover tries Skeet, he soon gets bitten with the 'Skeet bug', and from then on he will acquire more knowledge about shooting, pointing and lead of birds in a short while than he would learn otherwise in half a lifetime.

"The shooting position is the same as the field position when expecting to flush a bird; that is, the gun is held down and somewhat forward in the position of 'Ready', and the target is called for. The gun is thrown to the shoulder after the target is seen in the air, and not before. A free, easy style of constant swing is required, and following through even after pulling the trigger, maintaining a constant lead on the target, is necessary. Targets should be broken as near as possible to the centre of the Skeet field and over Station 8. To sum up, the beginner should cultivate: alertness, concentration, easy stance or position, swing, lead and follow through, and practice to improve skill.

This is No. 7 of a series of 12 articles on Skeet Shooting. Cut it out. When all have been clipped, you will have a complete write-up of this sportsman's sport which is rapidly becoming the vogue across Canada.

## HEALTH

by **Dr. J. H. H. H.**  
A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

### OPEN WINDOWS

"Night air is bad air, and therefore, you should keep your windows closed at night" was the general belief until just a few years ago. It was not until the beginning of this century that the value of fresh air was first taught as part of campaign launched against tuberculosis at that time.

Many people still seem to be afraid of fresh air; they apparently hold to the old belief that night air is different from day air and is, in consequence, injur-

ious. At last, it seems fair to believe that this is their opinion when we learn, from an article in a recent issue of The Canadian Public Health Journal that a study of the habits of over two thousand school children showed that over twenty-five per cent of these children slept in rooms with closed windows.

It is important to know that the study revealed no appreciable difference between girls and boys, but that the older children had a better record than the younger. It might be expected that there would be a marked difference between children according to the incomes of their homes. It would seem a natural explanation that in homes where there was difficulty in finding the wherewithal to keep warm, there would be less likelihood of open bedroom windows at night. Strange to say, there was practically no difference as regards income levels, so apparently the bedroom windows of the well-to-do are as frequently kept closed as are those of the economically less fortunate neighbours.

This study is of particular interest to all who are interested

## WEEKLY LETTER LAMB FEEDING

This is the time of the year when plans and preparations are being made for the feeding of lambs on many farms in this district and it appears a timely topic for a weekly letter. The importance of getting the lambs early and putting them on feed at once in preference to leaving them with the rancher, too often is not recognized. Early fall storms give the lambs a set back which requires a large amount of feed to overcome whereas if the lambs are in the feed yards before the storms occur this set back will not occur. Not only will the feeder benefit from this but it will also be to the advantage of the rancher as the storms cause a heavy shrink in the lambs.

Sore mouth is a condition often found in feeder lambs and is largely caused by coarse, hard feed to which the lambs are not accustomed. When this condition occurs the lambs are not able to eat well, consequently make no gains, in fact in many cases suffer severe losses in weight and bloom. Because of this the practice of ranging lambs in stubble fields is of doubtful value, for while they may obtain some feed in this manner, and make slight gains, the danger of loss is too great.

When lambs are first put on feed it is desirable that only high quality, palatable feeds be used. Care should be taken not to overfeed grain the first couple of weeks, but to gradually increase the grain as lambs indicate a desire for it. As it is essential to get the lambs highly finished before they become overweight, it is necessary to prevent excessive growth. Some growth naturally will occur in the process of finishing, but it should be limited. In order to attain the desired finish, heavy grain feeding is necessary, up to two pounds per day during the latter part of the feeding period being what the lambs will usually consume. The heavier grains, barley and wheat, are more desirable than oats for finishing though oats are preferable for starting the lambs on feed with a gradual change being made as soon as the lambs have become accustomed to the

in health, and especially so to those who have been teaching health habits in their own homes or in a wider field. At first, it may appear to be surprising and disappointing that such a large proportion of a group of school children should be deprived of fresh air which is free and to be had for the taking. Those who recall conditions as they were thirty years ago, when not only were windows kept closed but all cracks and crevices were carefully stuffed against the odd whiff of incoming air, will wonder not that twenty-five per cent still keep their windows closed, but that in these comparatively few years, seventy-five per cent have learned to leave their bedroom windows open at night.

Are you one of the minority clinging to old beliefs and fears or have you joined the enlightened majority who secure for themselves hours in the fresh air while they sleep?

Questions concerning Health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by letter.

## EXPERIMENTAL STATION, LETHBRIDGE

### grain feeding.

The feeding trials conducted at the Experimental Station during the last few years indicate that it takes about 4½ pounds of grain and approximately the same amount of hay to produce one pound of gain. However, in order to be safe the feeder would do well to calculate on the basis of slightly higher grain and hay consumption per pound of gain. Where wet beet pulp is available at a reasonable price it constitutes a desirable supplement to a hay and grain ration.

Careful consideration should be given to the water supply as free access to both salt and water is essential if the lambs are to make good and economical gains.

SUBSCRIBE to the RECORDER.

## NEXT YEAR'S GRASS-HOPPER

Grasshoppers will be with us again next year according to provincial field crops branch which issues a warning to farmers and some advice as to cultivation to minimize the infestation next spring. It is pointed out that any tillage which can be carried on to destroy all eggs in stubble and will reduce next year's outbreak to such an extent that poisoning will only be necessary along the edges of fields. Farmers are urged to keep in touch with the department at Edmonton, or the federal Entomological service at Lethbridge for further advice on the problem.

## A BATTERY RADIO with Electric-Set PERFORMANCE

Here is the great invention every unwired home has waited for! Real electric set performance—tone quality, distance, ease of operation—and no more recharging of batteries!

The Air-Cell Radio will do everything that the finest electric set will do. It has been brought about by the invention of a marvelous new source of power—the EVEREADY Air-Cell "A" Battery. This battery breathes air and re-energizes itself for at least 1000 hours, which at 3 hours a day is almost a year's service in the average household.

Do not confuse the new Air-Cell Radio with the old type battery sets—Air-Cell Radio is new from the ground up—now being built by every leading radio manufacturer specially for Air-Cell performance.

Ask your dealer to demonstrate. Your interest will be well repaid.

### News Notes

LOST — Leather Jacket, between Anderson dump and town. Leave at Recorder Office.

FOR SALE — Oak Dining Room Suite. Good condition. Call at Vanda Grey's residence.

Attend the Mutual Dance in the Open Air Pavilion Saturday night. It may be your last Open Air dance this summer. If weather is unfavorable the dance will be held inside, so be there?

We need your support. Help us out. We certainly do appreciate those who bring us in their news items each week. It adds reader interest to the columns, and is appreciated.

Vern Henry was the lucky guy at the Capitol Wednesday night, and went home \$40 richer. The shock was almost too much for Vern and he had a hard time deciding what to do with his stake. People were present from all around, and many nearby towns for a chance at the \$40.

### ALBERTA BEE CONVENTION AT LETHBRIDGE, OCT. 22

Bee men from all parts of Alberta will be gathered at the bee convention to be held Monday, October 22nd, at the Y.M.C.A., Lethbridge.

The program includes an illustrated lecture on bee diseases by S. O. Hilderud, provincial apiculturist. Howard Stutchbury provincial trade commissioner, will discuss the marketing condition of honey. Mr. Gear, California package bee shipper, has for his topic the shipping of package bees, and R. W. Hawthorne will discuss the season management of a commercial apiary. Other prominent bee men, including Mr. Morgan of Brooks, and Mr. Graham of Coaldale, are also on the program. Mr. H. A. Craig, deputy minister of Agriculture, will be the luncheon speaker.

A fifty minute moving picture film, "The Realm of the Honey Bee," dealing with the life and habits of bees, will inspire and delight all who attend the convention.

Lee Brewerton was a Calgary visitor on business the last of this week.

### WHEAT INSTITUTE SUGGESTED

Proposals for forming the Canadian Wheat Institute as a national body to conduct work in the interests of Canadian wheat were endorsed by the annual convention of the Canadian Chamber of Commerce which met in Winnipeg on September 11th, 12th, and 13th. This followed an address by Mr. R. S. Law, president of the United Grain Growers Ltd., in the course of which he dealt with the need for putting a new force behind the sale of Canadian wheat and showed how through the proposed institute, advertising, commercial research, scientific research and other efforts might be brought to bear towards the enlargement of outlets for Canadian wheat.

Mr. Law spoke on the subject "Wheat from the National Standpoint" and much of his address was devoted to emphasizing the national importance of the wheat industry of Canada. In emphasizing that fact Mr. Law said: "It should be realized that growing wheat for export has been part of the basic policy of Canada for a third of a century. Upon it was founded the immigration policy of this country and the whole project of opening up Western Canada; upon it was predicated a large part of the country's railway construction and the building of canals and harbors. That western Canada should be opened up that people from other parts of the country and from other countries should be invited to come in, that financial institutions should pour their resources into the prairies and that factories should be built to supply the needs of farmers who were to grow wheat,—all that was part of the national determination of the country since the beginning of the century." In concluding his address Mr. Law said: "The welfare of western farmers, the welfare of western Canada, and to a large extent the welfare of the Dominion of Canada must continue to depend upon our ability to maintain large outlets for the wheat grown in the west, and that in turn may well depend upon our ability to keep a national understanding and maintain a national outlook on our wheat problem."

The resolution which was subsequently adopted by the convention of the Canadian Chamber of Commerce read as follows:—

"Realizing the importance of Canadian wheat production to the prosperity of Canada, the Chamber has been gratified to learn that those directly interested in the production and marketing of Canadian wheat have under consideration the organization of a Canadian Wheat Institute as a national body to stimulate the marketing and use of wheat in the markets of the world. The Chamber extends its closest co-operation in this endeavor."

### CHINA WANTS ALBERTA HORSES

Whether or not the Orient is preparing for war, the fact remains that China is making a demand on Canada for cavalry and artillery horses, and echoes of this demand have reached Alberta via Ottawa. This province should be able to produce 500 head or so of such war animals, it is believed by those who should know, and a canvass of the situation is now being made in reply to the queries from Ottawa.

### WHEAT INSPECTIONS

An interesting analysis of wheat inspections so far this year reflects the effects of the early heavy frost, on the grades of the grain in the northern districts, but reveals also very gratifying information that at Southern Alberta has not only marketed much more wheat at this date than was the case last year, but the grades are just as good if not a shade better.

Calgary reports a total of 5,200 cars inspected between August 15th and September 30th, with 89 per cent. of the wheat grading No. 2 or better, as compared with a total inspection of only 3,474 cars in the same period last year, with the grading percentage just about the same. At Edmonton, however, there is not only a drop of nearly 1,000 cars in the number inspected since August 15th, as compared with last year, but the percentage of those grading No. 2 or better has dropped this year to 72.2 percent. from last year's percentage of 91.

### NATURAL PRODUCTS

Total coal production in Alberta for the eight months ending August 31st this year was 2,574,536 tons, compared to 2,497,166 tons for the same period last year.

The eight-month production of petroleum or this year was 852,228 bbls. compared with 632,454 bbls. in the eight-month period of 1933.

Timber products for the 1933-34 fiscal year showed an improved condition over that for the 1932-33 year the lumber production being 55,208,052 board feet compared with 52,736,467 board feet in the previous year. Other lines of timber products showed similar increases.

## The Practical and the Ideal

Alberta Pool Elevators is a creation of the agricultural co-operative movement and as such is closely knit to the families on the land who believe in and act upon the principles of co-operation in order to better their condition.

Commercial success is highly important but it is to be regarded only as a means to an end—the improvement of the living conditions of rural people.

The major function of this extensive country and terminal elevator system owned by Alberta farmers is to give support to their natural aspirations for a more secure rural tenure.

Both the practical and the ideal sides of the farm movement are united in Alberta Pool Elevators and on this basis a general appeal for support is extended to all grain growers.

### THE PROPER CARE OF YOUR AUTOMOBILE

Selecting the Right Polish

IN the first article it was told how many motorists make the mistake of believing that their cars must be re-finished when the finish becomes dull and faded. In restoring the color and gloss of the finish, however, it is important that the right polishing material be selected. There is little advantage, for instance, in using an oily polish, because it doesn't remove the traffic film, but only forms an oil film over it.

The best results are obtained by the use of a polish which contains a mild solvent to soften the traffic film, and a light abrasive to clear away the chalked pigment and dirt.

Next: "Two Methods of Polishing"

**UNITED GRAIN GROWERS LTD**  
ELEVATOR AT RAYMOND

THE hunting season is here. In Canada the wine of early frosts is in the air and the maples, like banners of crimson and gold against the dark friendly evergreens, proclaim that once again the "red gods" hold high carnival. The woods are at their best—the moose is sleek and black, the buck deer has his horns burnished to his fancy, the coat of the black bear shines like silk and the lustrous robe of the grizzly is a study in

dark and grey. The big-horn sheep is restless and alert, the mountain goat snow white and the caribou in the prime. The grouse and woodcock are plump and contented in the coverts, while the ducks and geese are gathering in favourite feeding grounds in preparation for their long flight south.

The game areas of Canada, scattered from ocean to ocean, are readily accessible from any part of the continent. It is not a country for the wealthy sportsman only; the hunter with moderate means

may also be suited. Local residents can enjoy a trip at a very reasonable cost. Sportsmen from other lands are welcome and are only asked to show their appreciation of the privilege of access to her game fields by obeying the hunting laws and observing the ethics of sportsmanship. A publication entitled "Canada's Game Fields" which should be of interest to sportsmen planning a hunting trip in Canada may now be had upon application to the National Parks of Canada, Department of the Interior, Ottawa.
